Points, prizes, surprises and a trophy – we present you the ranking of the POLO+10 World Tour.

Two wonderful events have already taken place as part of the POLO+10 World Tour. We have received a very positive feedback and are glad about the huge interest in the tour. Full of anticipation we look forward to the upcoming tournaments in Mongolia, China, India, Argentina and Mexico.

At the POLO+10 World Tour the fun for the players has priority, but the teams also compete for the POLO+10 WORLD TOUR TROPHY. Subsequent to the first two tournaments in Ibiza and Morocco we now present you the current ranking of the tour.

At each event the players can gather points according to their placing. Each player of the winning team gains 100 points, the runners-up receive 75 points each, for third place 55 points are given to each player and the fourth-placed players get 40 points each. The points of all tournaments are summarized and this way result in the total score of the player and thereby his or her placing in the ranking.

The ranking is updated after each event and at the end of the tour the overall winner is ascertained, who receives the POLO+10 WORLD TOUR TROPHY. Additionally there will be many prizes and surprises, such as helmets, boots, coaching with famous polo players and polo coaches, and much more. Let yourself be surprised!

Currently Sébastien Le Page of Polo Park & Country Club Zürich leads the ranking with 175 points. He has won the tournament in Ibiza and in Morocco he was placed second with his team – thus it doesn't always have to be a victory to be at the top of the ranking. The reward for his effort: A polo training with Pablo Mac Donough in Chantilly as part of Richard Mille's private polo clinics, which he just received from us.

By the way: Currently all tournaments of the POLO+10 World Tour are played on a low goal level. We are continuously working on developing the tournaments further and are planning to integrate medium and high goal events in the future as well. There's still a lot ahead of us.
